Enclosures: Exempt Appendix1 – Review of Internal Controls at Investment Managers

Section 1 – Summary

The report sets out in summary the contents of the latest internal controls reports for eight of the Fund's ten investment managers. The reports have been reviewed and show that controls are operating effectively and, where exceptions have been identified, that there has been a satisfactory management response.

FOR INFORMATION

Section 2 – Report

1. The Report of the Auditor on the Pension Fund's 2009-10 Accounts recommended that due diligence is carried out on the strength of the operational controls at investment managers both through a review of internal controls reports and visits to key investment managers. At the November 2010 meeting of the, then, Pension Fund Investment Panel a template was introduced as a basis for measuring the level of assurance provided by the operational structure supporting each mandate.
2. Operational controls of investment managers relate to the procedures in place to safeguard the Fund's assets against loss through error or fraud and to ensure that client reporting is accurate. Poor operational controls can also hamper the management of the assets leading to reduced returns or increased costs. Should there be a lack of evidence that controls operated by investment managers are robust the continued appointment of the manager would be questionable.
3. Each of The Fund's investment managers prepares an annual report having regard to the International Standard on Assurance Engagements 3402 (ISAE 3402), issued by the International Auditing and Assurance Standards Board, the Technical Release AAF 01/06 (AAF 01/06), issued by the Institute of Chartered Accounts in England and Wales and the control objectives for their services and information technology.
4. Under these protocols the directors/partners of each manager prepare a report focussing on key environmental, business and process issues and make commitments along the following lines:
 - the report describes fairly the control procedures that relate to their stated control objectives;
 - the control procedures are suitably designed such that there is reasonable assurance that the specified control objectives would be achieved if the described control procedures were complied with satisfactorily; and
 - The control procedures described were operating with sufficient effectiveness to provide reasonable assurance that the related control objectives were achieved during the period specified.
5. Each of the managers has engaged a leading firm of auditors to report on the suitability of the design and operating effectiveness of the controls to achieve the related control objectives.
