Parks Buildings 2014 - 2018	Harrow's building assets in parks and open spaces have suffered from under-investment, under-maintenance and under-use for many years. There are serious concerns with the potential safety of a significant number of buildings through failure of electrical systems, water ingress through roofs and asbestos management concerns.	200		200	200		200	200		200	200		200
Parks Improvements 2014 - 2018	Harrow's parks and open spaces are an ageing asset that have suffered from under-investment, under-maintenance and consequential under-use for many years. The majority of parks infrastructure is reaching the end of its life. This programme addresses the worst areas of deterioration to protect the park and provide safe access and use of facilities for users. Harrow is already committed to parks renewal through improvement in maintenance standards.	500		500	500		500	500		500	500		500
Street Trees 2014 - 2018	Due to the age of the tree population, underlying clay soil geology and restricted root zone in highway situations many trees are high risk both in terms of safety and potential damage to property. In addition, much of our tree stock was planted in the 1930s and trees of this age do not respond well to the stress of an urban environment, placing our tree stock into a higher risk category.	50		50	50		50	50		50	50		50
Street Lighting 2014 - 2018	Through Harrow's Highway Asset Management Plan (HAMP), the asset value and lighting investment needs for the future are identified. This helps identify asset age, condition and replacement costs, providing the framework for rational assessment of assets in determining lighting investment needs, based on a set of weighted priority scores.	1,500		1,500	1,500		1,500	1,500		1,500	1,500		1,500

1 2014/15	the School Expansion Programme comprising the permanent expansion of 7 primary schools. Three of the schools are part of the Priority School Building Programme which will be delivered by the EFA. Of those, two were developed outside the programme, and continue to have budget against them in order to top up the government funded project if required. Four of the projects are complete, and there are therefore now only three remaining projects,		5,670	0			0			0			
School Expansion Phase 3 Programme 2014/16	The latest round of projections are showing yet another increase in the final expected sustainable peak in primary numbers. There will be further analysis before Phase 3 is taken forward, but based on current projection it would lead to a further 3 expansions being required. These are likely to be expensive solutions as we have already expanded the schools with simpler solutions. Without scoping based on specific schools, an estimate of £2.5m is being allowed for each of 3 expansions.	300	300	0	3,000	3,000	0	3,000	3,000	0	1,200	1,200	0
SEN Expansion Programme	SEN strategy is still under consideration. However, a number of successful SEB bids were made under TBNP, and these projects are now listed. It is expected currently that this will be the extent of the programme.	5,325	5,325	0	2,900	2,900	0			0			0
Secondary School Expansion Programme	Following the significant growth in our primary population, the numbers are expected to filter through to the secondary schools. Secondary expansion strategy is still under development, but we have been successful in two TBNP bids for secondary expansion/new school, and for the purposes of the bids, some basic assumptions have been made to enable a projected requirement for the entire programme. This includes assuming a final additional Primary expansion of 26 forms of entry, with 85% filtering	10,100	10,100	0	5,480	5,480	0	500	500	0	5,000	5,000	0

Leisure & Libraries Capital Infrastructure 14-18	Capital to be invested in a targeted programme to improve the infrastructure of the Council's leisure and library facilities. There is a high risk, particularly with Harrow Leisure Centre, that failure to maintain the infrastructure will inevitably lead to a building closure if a major fault occurs and be a risk to leisure income. The libraries' self service kiosks will also need to be refreshed by 2016-17.	300		300	300		300	300		300	150		150
Replacement sports pitches at Bannister Stadium	Replacement of sports pitches lost from Kodak site at Bannister Stadium to be funded from s106 from Kodak site development.	1,000	1,000	0									
Reform of Social Care funding	The Capital funding will be used to support the implementation of the Dilnot Commission and build new information system(s) to support the requirements including self-assessment tools to mitigate the large increase in demand for assessment and financial modelling.	250	125	125	575	288	287	475	238	237	125	63	62
Residential Service Personalisation	The Capital Investment is required to develop new and adapt existing Case Management Systems and the online Social Care Marketplace 'My Community ePurse' to accommodate the requirements of Residential Personal Budgets.			0	250		250	250		250			0
Integrated Health Model	Develop a connection to the Health N3 Secure Network Integrating IT systems (MOSAIC and Jade) to develop an integrated care record across health and social care Development of buildings (existing or new) to allow the set up of shared treatment facilities for health and social care IT infrastructure to support a move to 24/7 availability of care	250	125	125	500	250	250	500	250	250	500	250	250
Carers Services Changes	The investment will include the development of a Resource Allocation System for Informal Carers and new Information & Advice on-line systems. An On-line self assessment system will also be required to manage the scale of demand likely to approach the Council.	100			100	50	50	100	50	50			0
Mosaic Implementation 14/15 – Adults and Children's Services	The purpose of this project is to implement Corelogic's next generation case management system, Mosaic, replacing Framework-i. The project will include business process reengineering across both Children's and Adults Directorates as well as implementation of, and migration to, Mosaic. Financial aspects of the system will also be re-designed to take into account changes to statutory returns.	250		250			0			0			0

Empty properties grant and private sector initiatives 2014/15 to 2017/18	This is a project proposal for approval of £800k capital funding over the 4 year 2014/15 to 2017/18 capital programme (£200k per annum). £150k is requested annually to bring approximately 25 private sector empty properties in Harrow back into use by offering renovation grants to landlords (for up to 70% of renovation costs) in exchange for nomination rights to the Council. The properties would be used to house homeless households and those in emergency B & B accommodation. A further £50k p.a. is proposed for private sector initiatives to be developed to prevent homelessness and save on the B & B cost.	676	476	200	200		200	200		200	200		200

HRA 14/15-17/18	The figures are taken from the 30 year HRA business plan which was approved by cabinet on 20 June 2013. This demonstrated that the HRA is in a sound financial position following the introduction of self financing, and has sufficiently strong revenue streams to support both a significant investment programme in the stock and the commencement of a programme of building new affordable housing. The programme is based on information from the stock condition and ensures the programme continues			7,527	7,827		7,827	8,412		8,412	9,139		9,139
