

EQUIA Tasks – Response to Survey Results (as at 8/1/2015)

Overview of Analysis

Age

- eStart data shows that 86% of all CC users are Children Aged 0-5, 12% are children aged 5-12 and 0.6% are children aged 13 – 18. (We assume a large number of staff/other residents have completed the survey too hence the 16.87% stating 'Other')
- **This age breakdown for Childrens centre usage is in similar proportion to the age breakdown on the survey response**

Parents/Carers with Disabilities

- eStart data shows that 0.5% of all parents accessing centres have stated they have a disability. 27 parents/adults with disabilities have responded to the consultation which is 5.3% of all adults/parents that have completed the survey (based on 504 responses). **This is a higher proportion than the 0.5% of parents with disabilities seen on eStart which indicates they have been fairly represented on the consultation responses so far.**

Children with Disabilities

- eStart data shows that 0.6% of all children accessing centres have stated they have a disability. 31 individuals indicating they have a child with disabilities have responded to the consultation which is 6.1% of all adults/parents that have completed the survey (based on 504 responses). **This is a higher proportion than the 0.6% of children with disabilities seen on eStart which indicates they have been fairly represented on the consultation responses so far.**

Teenage parents

- eStart data shows that 0.5% of all parents accessing centres are teenage parents. 23 individuals completing the consultation have indicated that they are a teenage parent which is 4.5% of all parents completing the survey. **This is a higher proportion than the 0.5% of teenage parents seen on eStart which indicates they have been fairly represented on the consultation responses so far.**

Lone parents

- eStart data shows that 3.3% of all parents accessing centres are lone parents. 33 individuals completing the consultation have indicated that they are a lone parent which is 6.5% of all parents completing the survey. **This is a higher proportion than the 3.3% of lone parents seen on eStart which indicates they have been fairly represented on the consultation responses so far.**

Fathers

- eStart data shows that 24% of all parents accessing centres are fathers. 14 individuals completing the consultation have indicated that they are a male which is 7% of all parents completing the survey. **This is a lower proportion than the 24% of fathers seen on eStart.** However, in the majority of cases Hub managers have reported that although father is present while the mother completes the survey, the survey response is generally submitted from the mother which explains the higher proportion of female responses. Also some of the responses would be from female staff members.

Ethnicity: Asian/Asian British

- eStart data shows that 45% of Centre users are noted as being Asian Indian, Asian other or Asian Pakistani. **This is similar to the consultation response of Asian/Asian British proportion of 43.5%**
- **Asian Indian and Asian Pakistani are shown to be well represented on consultation response with the proportions being similar to those on eStart**
- In the December report update, the group under represented was the Asian Other community. The Jan report shows a significant increase in responses from the Sri Lankan/Tamil community which is good. The response from Afghan community is higher also but only 9 responses from Afghan community so this could have been slightly higher – but they may not have ticked the right box for their Ethnicity

Ethnicity: Black/Black british

- eStart data shows that 5.6% of Centre users are noted as being Black African, Black Caribbean or Black Other. **This is higher than the consultation response of Black/Black British proportion of 1.98%**
- **Black Caribbean are shown to be well represented on consultation response with the proportions being similar to those on eStart**
- **eStart data shows 3.5% of all centre users are Black African and on the consultation only 0.43% are Black African.** In the December report, the group under represented was the Black African community – in particular Somali. The Jan report shows the numbers responding from the Black ethnic groups has increased and is in line with the proportion of our centre users that are Black African. There has been an increase in numbers of responses from Black African & Somali since December which is a good improvement.

Ethnicity: White/White British

- eStart data shows that 33% of Centre users are noted as being White British, White Irish or White Other. **This is lower than the consultation response of White/British proportion of 49% indicating a high proportion of this group have responded.**
- **White British and White Irish are shown to be well represented on consultation response with the proportions being similar or higher to those on eStart**

- **eStart data shows 19% of all centre users are White Other (mainly Romanian) and on the December report consultation only 10.4% are White Other/Polish/Romanian.** Polish community. The Jan report shows There has been an increase in responses from these groups – however the total proportion of responses from White Other/Polish/Romanian groups is still slightly lower than we'd expect. However they may have ticked 'Other' as their Ethnicity

Ethnicity: Mixed

- eStart data shows that 1.95% of Centre users are noted as being of Mixed origin. **This is similar to the consultation response of Mixed proportion of 2.17% indicating a fair proportion of this group have responded.**

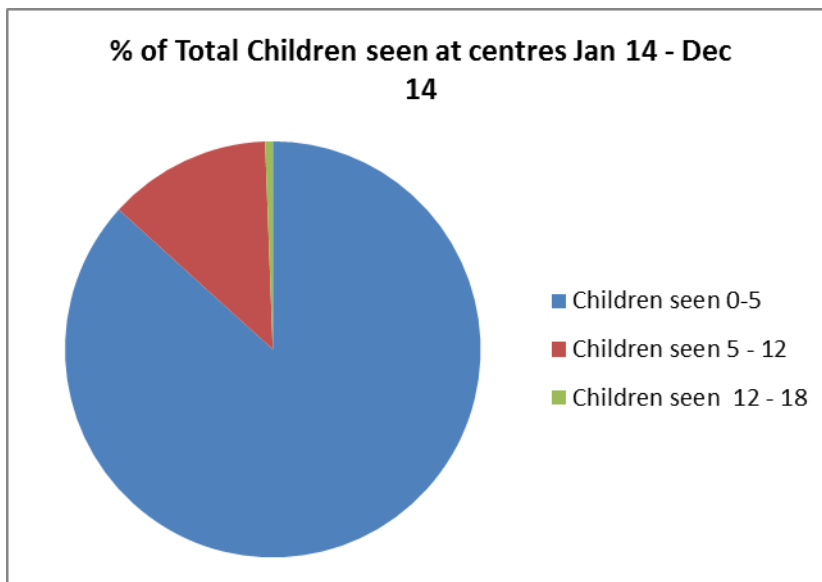

Further detail: EQUIA Tasks – Response to Survey Results

1. Ref: P 9, Question 2

eStart data

	Number seen Jan 14 - Dec 14 (Count)	% of Total Children seen at centres Jan 14 - Dec 14
Children seen 0-5	7444	86.7%
Children seen 5 - 12	1089	12.7%
Children seen 12 - 18	51	0.6%
	8584	

Looks in similar proportion as those who have responded to survey so far

2. Ref: Page 123. Question : what is your age?

eStart doesn't have a standard report on parents age and would take time to get Capita to get this in place – maybe response in No. Xx below would help this question?

3. Ref: page 124. Disability

eStart data

	Number seen Jan 14 - Dec 14 (Count)	% of Total Parents/Carers seen at centres Jan 14 - Dec 14	Notes
Parents with Disabilities	47	0.5%	Majority of this group seen at Hillview Hub
Total Parents/carers seen	9910		

11 parents/adults with disabilities have responded to the consultation which is 4.7% of all adults/parents that have completed the survey (based on 230 responses). This is higher than the 0.5% of parents with disabilities seen on eStart (see table above)

4. Ref: Page 125. Disability of child

	Number seen Jan 14 - Dec 14 (Count)	% of Total Children seen at centres Jan 14 - Dec 14
Children Seen age 0 -18 that have a disability	51	0.6%
Children Seen age 0 -18	8584	

5. Ref: Page 128. Groups

	Number seen Jan 14 - Dec 14 (Count)	% of Total Parents/Carers seen at centres Jan 14 - Dec 14	Notes
Parents with Disabilities	47	0.5%	Majority of this group seen at Hillview Hub
Teenage Parents	54	0.5%	majority of this group seen at Cedars Hub
Fathers	2396	24.2%	

Lone Parents	330	3.3%	Majority of this group seen at Cedars & Kenmore Hub
Grandparents	211	2.1%	
Total Parents/carers seen	9910		

Based on above, the proportion of Lone Parents & teenage parents responding to survey is in line (or better) than what we would expect.

However, looking at the numbers, 330 known lone parents have accessed the centre in the last 12 months so it would be beneficial for slightly more than 16 to respond

6. Ref: P.132 – p.141. Ethnic Origin of Parent

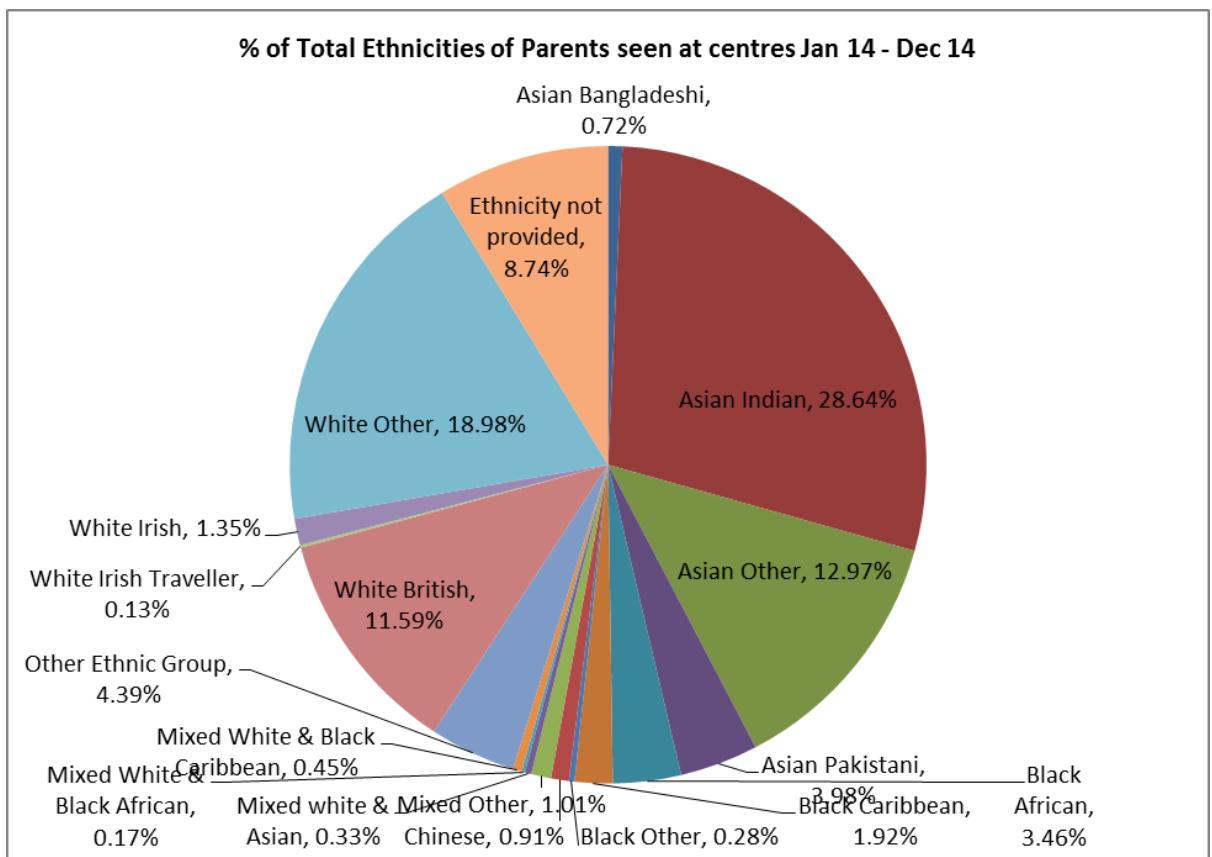

Table showing Ethnicities of Parents at all Centres Jan 14 – Dec 14

Ethnicity	Number seen Jan 14 - Dec 14 (Count)	% of Total Ethnicities of Parents seen at centres Jan 14 - Dec 14
Asian Bangladeshi	74	0.72%
Asian Indian	2934	28.64%
Asian Other	1329	12.97%
Asian Pakistani	408	3.98%
Black African	354	3.46%
Black Caribbean	197	1.92%
Black Other	29	0.28%
Chinese	93	0.91%
Mixed Other	103	1.01%
Mixed white & Asian	34	0.33%
Mixed White & Black African	17	0.17%
		0.45%
Mixed White & Black Caribbean	46	
Other Ethnic Group	450	4.39%
White British	1187	11.59%
White Irish Traveller	13	0.13%
		1.35%
White Irish	138	

White Other	1945	18.98%
Ethnicity not provided	895	8.74%
Total	10246	

- **Based on data on ethnicities above, we would expect a similar percentage to respond to survey – so need to increase response from Asian Other community and Black African community**

Graph showing Ethnicities of Parents reached at all Centres Jan 14 – Dec 14

7. Ref: page 141. White Other Ethnicity

EQUIA panel suggested Polish numbers to respond seemed low. 4 Polish responses so far which is 1.7% of all responses.

Census 2011 data shows 5.7% of Harrow's residents are Polish speakers and 6.9% are Romanian speakers

It is possible that Polish families may have ticked the 'Other White' category
