## Part B –Numbers of CLA and CPP over time

Numbers of Looked After Children and Children with a Child Protection Plan (snapshot)

CPP numbers rose significantly in 2013-14 - the rise corresponds with a lowering of thresholds. The numbers dropped during 2014-15 but have started to rise again during 2015-16. At 30<sup>th</sup> June 2015 the rate per 10,000 children was 37.8 and this is the highest since 2010.

CLA numbers have remained relatively stable since 2010 and at 30<sup>th</sup> June the rate per 10,000 children was 30.8 compared to 30.0 at the end of March 2014. Harrow continues to have a significantly lower rate of CLA than comparators (almost 10 per 10,000 lower). Further analysis of the statistical neighbours group shows that Merton, Kingston, Redbridge and Sutton have similar rates. The average is pulled up by Brent, Hillingdon, Hounslow and Ealing which have high numbers of CLA (300+).

Rate of CPP per 10,000 children aged under 18

Rate of CLA per 10,000 children aged under 18

CLA by Age Group

The number and proportion of CLA aged up to 4 is higher than statistical neighbours and England averages and lower for age groups between 5 and 15. Compared to 2013-14 data there are small but not significant changes in different age groups.

In line with comparators, London and England, Harrow historically has a higher proportion of males who are looked after, although the proportion of females has increased since 2012.

**C3 – Children looked after ethnicity.** (Comparator info. source SSDA 903 March 2014)

**CLA by Ethnicity**

As would be expected of Harrow's diverse population, the representation of Black and Minority Ethnic groups is considerably higher than England and the statistical neighbour average.

Overall just over two thirds of Harrow's children looked after population are from BME groups

There have been some changes in the ethnic background of our CLA population over the longer term - the proportion of CLA in mixed groups, Asian and White groups has dropped. There is an increase in the proportion of looked after children from Black and from other ethnic groups.

### Harrow Placement Details at 30<sup>th</sup> June 2015

CLA by placement types

The types of placements of our CLA are fairly stable with a slight increase in placements with family and friends and in independent living. In house placements can fluctuate as most of the emergency and short-term placements are made with in-house carers.

All placement moves are scrutinised at a panel for authorisation before they are implemented. Support packages have been developed to prevent placement breakdown .

## C5 – CLA Health & Education Data

note that DfE indicators include only CLA who have been looked after for more than one year to measure outcomes, **Education data is updated annually**

#### Health Data for CLA:

All children who have been looked after over a year are required to have annual health and dental checks but some refuse; 87.5% of new CLA have had a health check in the target timescale of 28 days. This academic year (to June) 18.6% school aged CLA 1+ have had at least 1 fixed term exclusion, while 1.7% have been permanently excluded. 23.5% of all CLA are classified as persistent absentees missing 13.4% or more of school sessions. Please note DfE measures children who have been looked after 1 year plus **and** are on roll only, Published figures denote small numbers and data is suppressed.

### Part D – D1: Children subject to a Child Protection Plan (CPP) by age group

Children are made the subject of a child protection plan (CPP) when they are considered to be at risk of physical, sexual, emotional harm or neglect. Over the past three years, Harrow has seen a very large increase of in the number of children with a CPP, from 118 in May 2012 to 211 in June 2015 (an increase of 79%). However, over the past three quarters, the number has fluctuated, dropping to 178 in March 2015, but rising the following quarter.

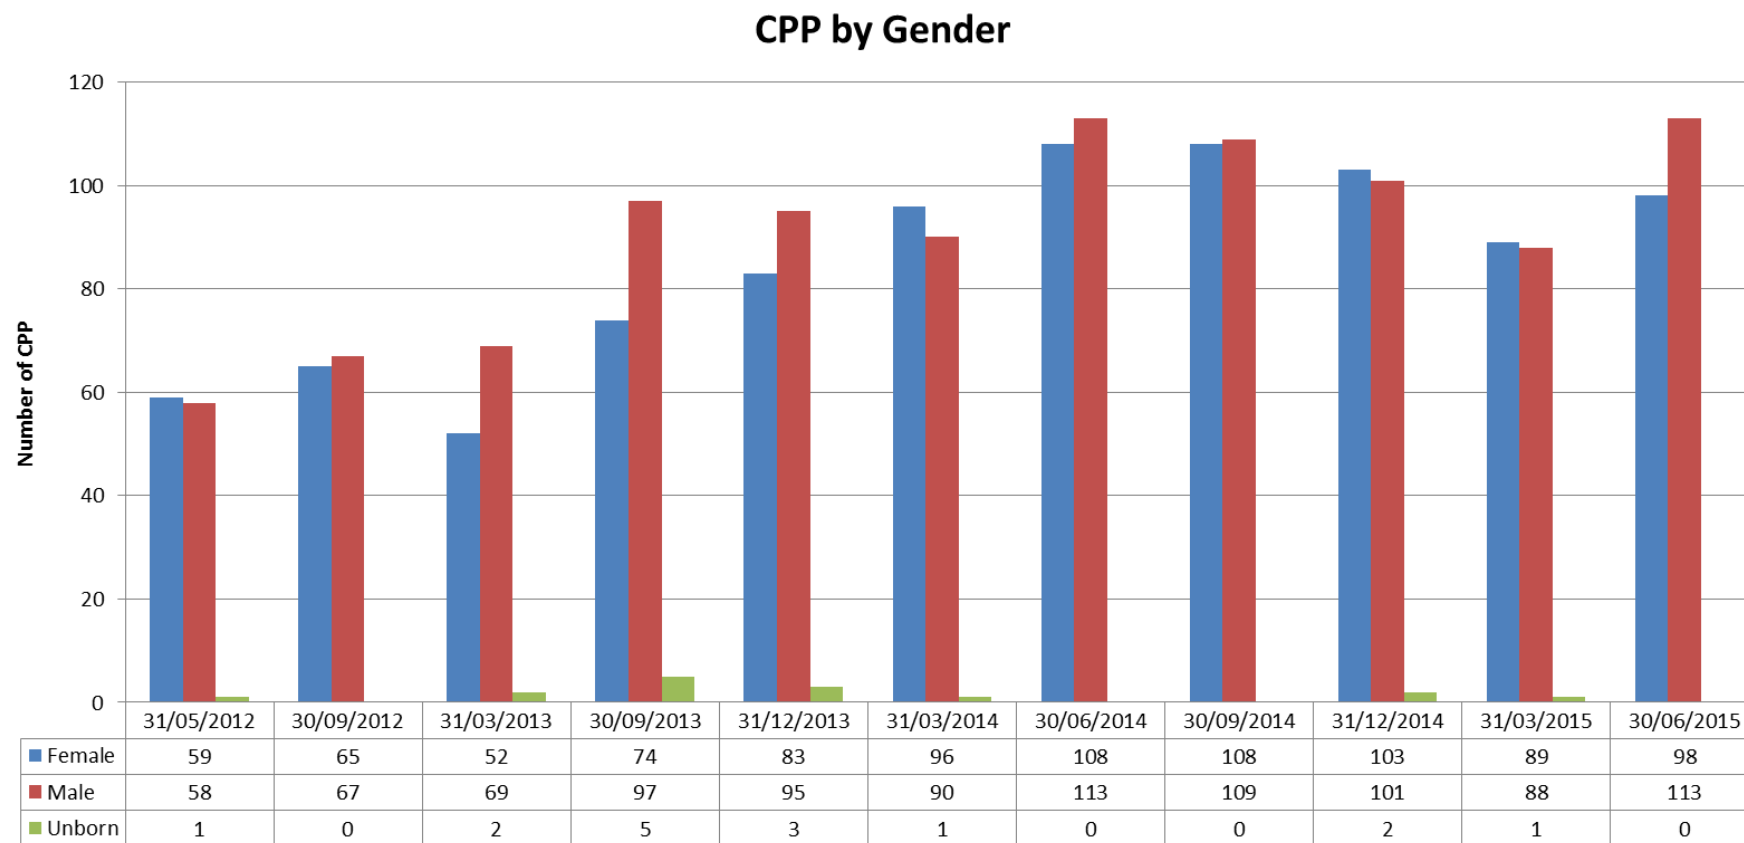

The proportion of children with a CPP aged 1-4 increased at the start of 2014-15 but is now dropping. The proportion aged 5 – 15 decreased over 2014-15 but is now rising.

**Comparator info. for age group of children with CPP's at 31<sup>st</sup> March 2014 (%)** Source: CiN Census (numbers under 5 suppressed)

## D2: Children subject to a Child Protection Plan (CPP) by gender

The proportions of males and females subject to a child protection plan balanced during 2014-15 at around half and half, but there were significantly more males during 2013 and there are more again now.

Harrow	51.2	47.3	1.5
<b>Harrow Jun 15</b>	<b>53.6</b>	<b>46.4</b>	<b>0.0</b>

## D3 - CPP by Ethnicity

The proportion of BME groups is considerably higher than England and London averages but this is as expected due to Harrow's diverse population; around two thirds of children requiring a child protection plan in Harrow are from BME groups. There were significant decreases over the past two years in the proportion from white communities, but this increased in the latest quarter. There have been increases in proportions from Black and from 'Other' communities.

## D4 - CPP by category of abuse

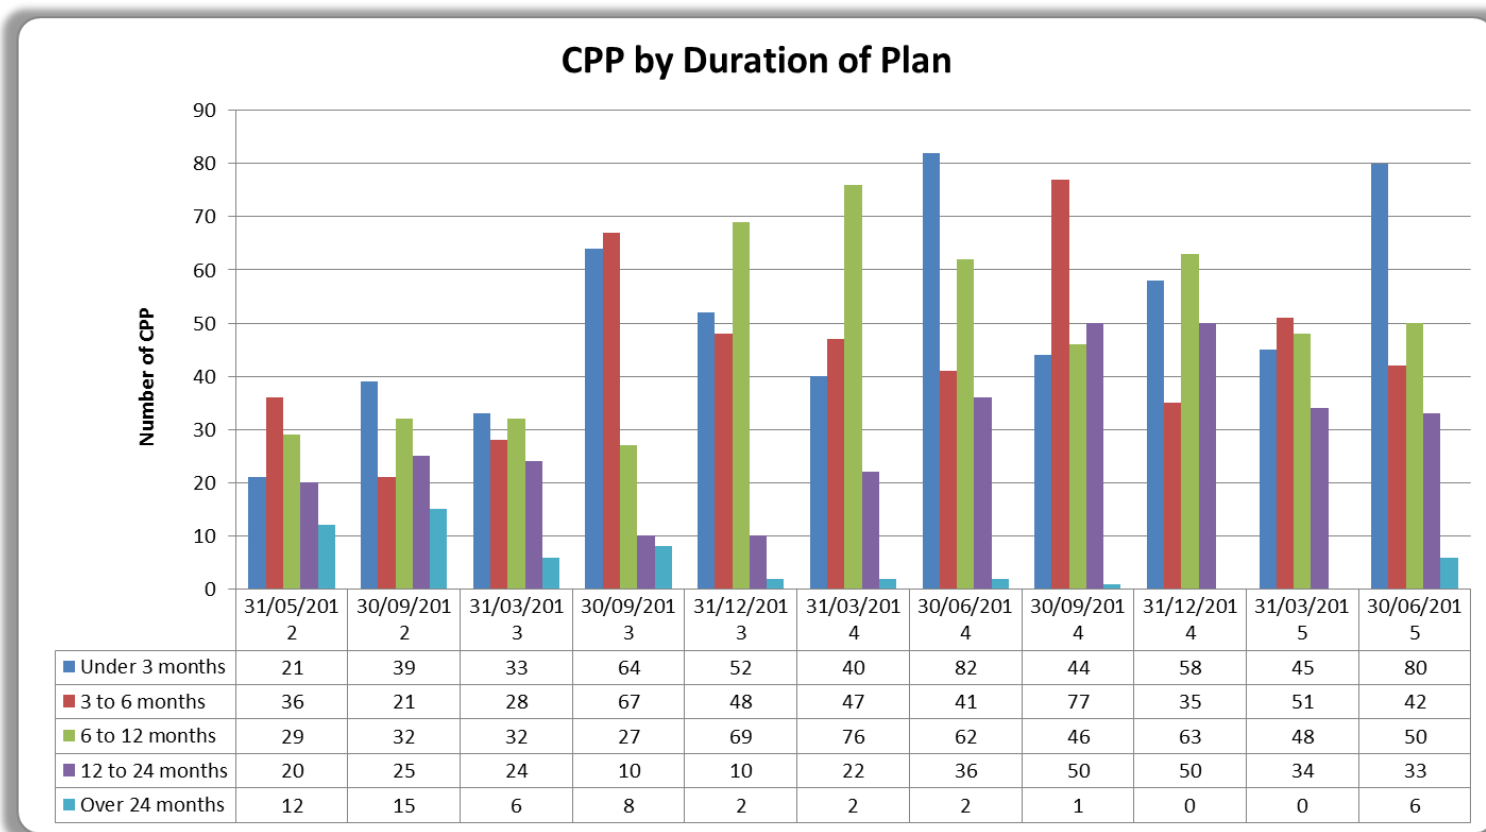

The proportion of children requiring a plan under the category of 'neglect' has dropped during 2014-15, but rose in the latest quarter and the proportion under the emotional abuse category has increased. The issue of children with multiple categories recorded (15 at 30<sup>th</sup> June 2015) is being addressed.

## D5 - CPP by duration of plan

Co-ordinated work has continued to progress and end plans in a timely manner, meaning that the numbers of plans lasting over 24 months have reduced gradually; at the end of December 2014 and March 2015 there were no children with a plan lasting 2 years or more. However, the number at 30<sup>th</sup> June 2015 was 6
