## **Section 2 – Report**

This presentation provides a CCG update on the A&E Performance at London North West Healthcare Trust in 2015/16 up to November 2015 (M6), and also compares it to the same period last year (2014/15) wherever possible.

A&E performance has been below the national 4 hour wait target of 95% for all of 2015/16. However, All Types performance has generally been tracking slightly below the improvement trajectory that was set with the Tripartite (NHS England, Trust Development Authority and Monitor).

There are a number of reasons why performance has been below target and some of this includes; bed capacity and patient flow, Ambulance conveyances and patient handover as well as some staffing issues

LNWHT has been working with commissioners and the local authority across the health and social economy to reduce breaches in order to meet the national 4-hour 95% target where the patient was seen, treated and discharged.

The report provides further detail on some of the issues and improvement actions.
