FOR INFORMATION

Section 2 – Report

1. The Report of the Auditor on the Pension Fund's 2009-10 Accounts recommended that due diligence be carried out on the strength of the operational controls at investment managers both through a review of internal controls reports and visits to key investment managers. At the November 2010 meeting of the, then, Pension Fund Investment Panel a

template was introduced as a basis for measuring the level of assurance provided by the operational structure supporting each mandate.

2. Operational controls of investment managers relate to the procedures in place to safeguard the Fund's assets against loss through error or fraud and to ensure that client reporting is accurate. Poor operational controls can also hamper the management of the assets leading to reduced returns or increased costs. Should there be a lack of evidence that controls operated by investment managers are robust the continued appointment of the manager would be questionable.
3. Operational control reviews focus on the key environmental, business and process issues. A summary of the findings from the most recent reviews is provided in the Appendix. The key points from the findings in respect of the Fund's current managers are as follows:
