Written response to Supplemental Question 5

Supplemental Question: Whether Councillor Robson was aware of the issues at the Kenmore Park schools and what action was being taken

Written Response: The Kenmore Park schools have had a construction project to expand the schools and make some improvements requested by the schools. The construction work was undertaken by Keepmoat, Harrow Council's framework partner when the project was procured.

Following completion of the construction work, a number of building issues have been identified that are being considered and addressed, which range from comparatively minor matters to an issue of serious concern. Some of the matters are under further investigation to establish who has responsibility to resolve them. The schools are kept involved and informed by the Children's Capital Project Team, including through visits to discuss the issues directly with school representatives.

The Children's Capital Project Team is coordinating work to resolve the issues. The respective interests of the Council and the schools are being preserved while this occurs and relevant sections of the Council are involved as necessary, including the Insurance Team and Legal Services.
