

Harrow STP have begun to articulate the NW London STP at a local level, the objective being a document which will pull together all initiatives in the Harrow locality which will deliver on the STP Delivery Area Priorities. We have requested support from GEHCF to help facilitate this.

### **To date we have**

- Established an SRO for the Harrow STP document
- Agreed leads for each of the 5 Delivery Areas of the STP
- Communicated intentions of the work – and information on how this will happen
- Met with the leads and agreed objective and programme plan
- Collected key information on work currently ongoing and planned from the organisations in Harrow to map against the delivery areas
- Arranged a further timetable of working groups to agree direction of Harrow STP

### **We will**

- Define with the SRO the form of the document and the sign-off process
- Meet as a Harrow STP group, comprising leaders from each Delivery Area to define and decide the prioritisation for the Harrow STP
- Meet at a Delivery Area working group level to confirm the content of the document by delivery area
- Develop narrative for each Delivery Area to be included in the Harrow STP
- Develop a single Harrow STP document which covers all Delivery Areas, setting out current and future activities around the Delivery Areas which are specific to the Harrow locality as well as those being delivered at an STP level which impact Harrow's population
