

**HARROW COUNCIL**

**ADDENDUM**

**PLANNING COMMITTEE**

**DATE : 30<sup>th</sup> May 2018**

<p>1/01</p>	<p><b>AMEND</b></p> <p><b><u>Addendum Item 1</u></b></p> <p><b>Amend</b> paragraph at 2.2 to read the following:</p> <p>The proposed dwellinghouses would be a mixture of ten x three bed six persons and fourteen x four bed six persons. The three beds would have an internal area of 106sqm and the four beds an internal area of 113 sqm.</p> <p><b><u>Addendum Item 2</u></b></p> <p><b>Add</b> paragraph at 6.7.11 to read the following:</p> <p>The proposed development would introduce 24 residential units to the application site. It is likely that up to a maximum of 144 people would occupy the proposed development. Given the mixed character of the surrounding area and the existing use on site, the proposed development would not unacceptably exacerbate any existing levels of noise and disturbance experienced within the area. In this respect, any potential amenity impacts would be limited to the scale and siting of the proposed new dwellinghouses.</p> <p><b><u>Addendum Item 3</u></b></p> <p><b>Amend</b> paragraph 6.10.4 to read the following:</p> <p>The methodology for the proposed Energy Strategy accords with the hierarchy set out within the London Plan and demonstrates how the minimum savings in carbon emissions against Building Control targets would be achieved on site. The addition of green roofs to the flat roof elements of the proposed terrace could help to further reduce emissions. The use of Photovoltaic Panels would be used to ensure that this</p>

reduction could potentially be met by the development. The proposal would need to be zero carbon as stated within the London Plan (2016) and as such the energy statement would need to be revised to illustrate this.
