Equality Impact Assessment Template

The Council has revised and simplified its Equality Impact Assessment process (EqIA). There is now just one Template. Lead Officers will need to complete **Stages 1-3** to determine whether a full EqIA is required and the need to complete the whole template.

- In order to complete this assessment, it is important that you have read the Corporate Guidelines on EqIAs and preferably completed the EqIA E-learning Module.
- You are also encouraged to refer to the EqIA Template with Guidance Notes to assist you in completing this template.
- SIGN OFF: All EqIAs need to be signed off by your Directorate Equality Task Groups.
- Legal will NOT accept any report without a fully completed, Quality Assured and signed off EqIA.
- The EqIA Guidance, Template and sign off process is available on the Hub under Equality and Diversity

Stage 1: Overview							
 What are you trying to do? (Explain your proposals here e.g. introduction of a new service or policy, policy review, changing criteria, reduction / removal of service, restructure, deletion of posts etc) 	An opportunity to optimise food waste collection routes arises following the recent communication from WLWA that a planning permission to construct a food waste transfer facility at Victoria Road will be submitted. The service employs 6 food waste collection crews. Food waste is currently delivered to the transfer station in Brentford. The journey time to and from the transfer station means that it is difficult to seek efficiencies under the current arrangement. Victoria Road is geographically closer and therefore it will reduce travelling time for tipping food waste. Indicative timetable suggested by WLWA is that the new facility at Victoria Road will be made available in 18 months' time (i.e. around April 2018), subject to achieving a successful planning application. Initial assessments by the service indicate that the routes can be optimised to achieve efficiencies, however a route optimisation exercise will need to be carried out to confirm the number of rounds that can come out. At this stage, it is considered possible to reduce the number of rounds from 6 to 5. In order to provide the most efficient service, considerations will need to be given on the vehicle type & size. Any changes to vehicle requirements may have a financial impact on the annual hire charge. Currently the food waste vehicles are on short term hire. At this stage, it is assumed						

		the budget provision for these vehicles (if any is required).	e shor	rt term hire vehicles is suffic	ient to cover the hire cost of	new

Stage 3: Assessing Potential Disproportionate Impact						
5. Based on the evidence you have considered so far, is there a risk that your proposals could potentially have a disproportionate adverse impact						

5. Based on the evidence you have considered so far, is there a risk that your proposals could potentially have a disproportionate adverse impact on any of the Protected Characteristics?

YES - If there is a risk of disproportionate adverse Impact on any ONE of the Protected Characteristics, complete a FULL EqIA.

- **Best Practice:** You may want to consider setting up a Working Group (including colleagues, partners, stakeholders, voluntary community sector organisations, service users and Unions) to develop the rest of the EqIA
- It will be useful to also collate further evidence (additional data, consultation with the relevant communities, stakeholder groups and service users directly affected by your proposals) to further assess the potential disproportionate impact identified and how this can be mitigated.
- NO If you have ticked 'No' to all of the above, then go to Stage 6
- Although the assessment may not have identified potential disproportionate impact, you may have identified actions which can be taken to advance equality of opportunity to make your proposals more inclusive. These actions should form your Improvement Action Plan at Stage 6

Stage 4: Further Consultation / Additional Evidence

6. What further consultation have you undertaken on your proposals as a result of your analysis at Stage 3?

Who was consulted? What consultation methods were used?				What do the results show about the impact on different groups / Protected Characteristics?	What actions have you taken to address the findings of the consultation? E.g. revising your proposals
