X - Figures suppressed in order to protect confidentially due to small number

* - Only one child in the cohort.

Note_ DfE published data for absence and exclusions will be lower as it only includes children looked after at 31st March whose data has been matched with the National Pupil Database, our in year monitoring includes all children so numbers will be higher.

(1) Attainment 8 - Attainment 8 measures the average achievement of pupils in up to 8 qualifications including English (double weighted if the combined English qualification, or both language and literature are taken), maths (double weighted), three further qualifications that count in the English Baccalaureate (EBacc) and three further qualifications that can be GCSE qualifications (including EBacc subjects) or any other non-GCSE qualifications on the DfE approved list.

(2) Progress 8 - Progress 8 aims to capture the progress a pupil makes from the end of key stage 2 to the end of key stage 4. It compares pupils' achievement – their Attainment 8 score – with the average Attainment 8 score of all pupils nationally who had a similar starting point (or 'prior attainment'), calculated using assessment results from the end of primary school. Progress 8 is a relative measure, therefore the national average Progress 8 score for mainstream schools is zero. When including pupils at special schools the national average is not zero as Progress 8 scores for special schools are calculated using Attainment 8 estimates based on pupils in mainstream schools.

Part B1 –Numbers of CLA over time

Number of CLA - the long-term trend

The number of all CLA has been increasing slightly in the last quarter with CLA 1yr + showing a decrease. The 3 year trend shows an overall decrease in CLA numbers

The rate of CLA per 10,000 has increased slightly in line with the increase of the overall CLA cohort in recent months. We continue to remain below the 2018 statistical neighbour average and England rates per 10,000.

Rate of CLA per 10,000 children aged under 18

CLA by Age Group

The main shift from the previous quarter has been an increase in the number of CLA under 5. Looking at annual figures the proportion of 16-17 year old CLA is high compared to the England and Statistical Neighbour averages. This is an additional pressure for leaving care services with approximately two thirds of care leavers aged 16 to 18 ceasing to be looked after at age 18.

Approximately three quarters of Harrow’s children looked after population are from BME groups which is significantly higher than the statistical neighbour average

This quarter the ethnicity which has shown the biggest movement is ‘other’ backgrounds with an increase of 5 CLA.

Published data shows Harrow to have a higher proportion of CLA from other backgrounds.

There are no significant changes to the proportion of placement types. Fostering remains the most common placement accounting for 64.5% of CLA followed by independent and semi independent placements accounting for 21.3%. Annual figures show us above the England and Statistical Neighbour average for the percentage of CLA in the secure units, children's homes and hostels category.

Comparator Info. for % of Main Placement Types of CLA at 31/03/2018 (Source: SSDA903)	Harrow	SN avg.	England

Published data shows Harrow has slightly less children in foster placements compared to SN average and more in community settings, this is mainly due to higher numbers of children aged 16+

B6 – school age CLA

School age CLA

Harrow monitors all school children and those looked after 1 year plus. At the end of March, 88 CLA are of statutory school age of whom 54 have been looked after for more than a year. There has been one permanent exclusion this academic year with 12.5% of CLA having at least one fixed term exclusion. As we head towards the Summer term this figure is expected to rise as seen in previous years. Overall session absence and persistent absence remains high and is significantly above the statistical neighbour average. PEP performance has continued to improve considerably with 97.7% of CLA having a PEP during the Autumn term.

B8 - CLA Health

Annual health checks have improved but along with dental checks remain below the statistical neighbour average. Immunisations have improved considerably to 76.5% and is in line with last years performance. CLA with up to date SDQ's has decreased to 66% from the previous quarter, our average SDQ score was higher in 2017/18 than the statistical neighbour and England averages.

Comparative Data (%) year ending 2018	Had annual Dental Check (%)	Had annual Health Assessment (%)	Up to date Immunisations (%)	Average Strengths and Difficulties Score

Statistical Neighbours	88.4	93.1	79	13.4
England Average	83.8	88.3	85.3	14.2

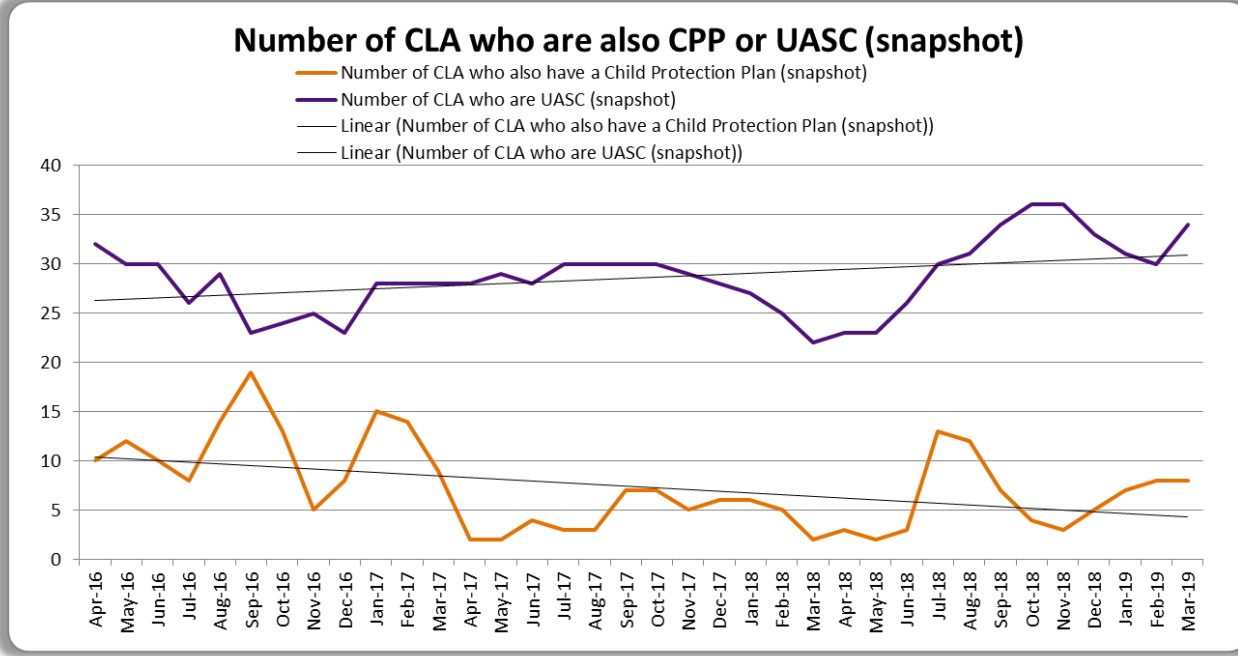

Note on SDQ scores: a score of under 14 is considered normal, 14-16 is borderline cause for concern and 17 or over is a cause for concern.

B9 – Number of new CLA, number of ceased CLA and number of children looked after who also have a child protection plan or are unaccompanied asylum seeking children.

The number of new and ceased CLA continues to vary, month on month.

The number of CLA who are UASC has seen an increase since the last report. The 3 year trend shows overall UASC figures increasing across the period. Looked after Children who have a child Protection Plan has seen an increase, this will fluctuate as discontinuing plans for children who become looked after needs involvement from partner agencies and is also dependent on the care plan for the child.

B10 – Reasons for entering and leaving care

When a 'Social Work Assessment' is carried out, the primary need is recorded in line with DfE categories. For children who are looked after at 31st March 2019, most common primary need type is Abuse or Neglect (51.5%) followed by Absent Parenting (22.5%).

The average time between receiving court authority to place a child and matching with adoptive family has remained stable from the previous quarter at 100.6 days but remains below comparator averages.

The suitable accommodation and NEET indicators can only look at activity in the period 3 months before and 1 month after the care leavers birthday in year. As such anything recorded outside of this period cannot be considered. Looking at current data excluding the constraints around birthday, 20.5% NEET and 9.8% not recorded.

% of CLA away from placement without authorisation at least on one occasion (year to date)	10	10.5	11.7	11	11.8	4.6	7.6	8.6	10

The percentage of CLA missing from placement has remained stable with absent children increasing from the previous quarter. Missing and absent children continue to remain a focus for Children's services with weekly and monthly multiagency meetings focussing on repeat offenders. A Runaways Worker is also in post and undertakes return interviews with children who go missing. Of all CLA year to date, 12.5% have had at least 1 missing episode with 10% having at least 1 absent episode, with the percentage absent from placement being above the statistical neighbour average.

B15 – CLA placement stability

% CLA with more than 2 placement moves in year

% CLA looked after for 2.5 years who have been in same placement for 2 years

The placement stability of our CLA with respect to number of placements has increased to 7.1% with 12 of our CLA having had 3 or more placements during the year, we are below the England and statistical neighbour averages. There are 20 CLA who have had 2 placement moves whereby another move in the year would have had a negative impact on the indicator. The percentage of CLA looked after for 2.5 years who have been in the same placement for 2 years has decreased to 63.2% with 24/38 CLA in placement for over 2 years, we are below the statistical neighbour average

B16– CLA placed over 20 miles from home

The percentage of all new CLA placed more than 20 miles from home has increased from the previous report to 9.8%, which is an improvement from our position of 16.7% at the same time last year. The percentage of all CLA at the end of each month who are placed more than 20 miles from home has increased slightly from the last quarter with those placed more than 50 miles from home remaining stable. In order to give a balanced view, these indicators exclude looked after children who are placed with parents, placed for adoption or are unaccompanied asylum seekers.

B17 – CLA Offending

The number of Looked After Children known to YOT has increased by 1 in the last quarter but remains low overall. Harrow's CLA offending rate is higher than comparators – this is being investigated and may be due to the comparatively small numbers of young people who are looked after, and a corresponding tendency towards higher levels of risk and vulnerability amongst this group.
