

Meeting:	Cabinet
Date:	3 August 2006
Subject:	Financial Position
Responsible Officer:	Myfanwy Barrett
Contact Officer:	Myfanwy Barrett
Portfolio Holder:	David Ashton
Key Decision:	No
Status:	Part I

Section 1: Summary

Decision Required

- To approve the proposed action plan, with the exception of the items that are subject to statutory consultation, to achieve the savings required in 2006-07.
- To approve the statutory consultation on the proposals in paragraph 17.
- To approve, subject to the outcome of consultation, the lowering of subsidies (Appendix 2)
- To approve the changes to fees and charges (Appendix 3).

Reason for report

To ensure that the savings target of £19m in 2006-07 is achieved.

Benefits

To establish a balanced budget for 2006-07 as another step towards restoring financial stability within the council.
To ensure that key services are protected.

Cost of Proposals

The report sets out how the Council's 2006-07 budget's proposed but unallocated savings will be achieved this year, and how the identified risks and pressures will be managed, and identifies subsidies that can be reduced.

Risks

The Council only has £2.5m in general balances, and, given the level of savings built into the budget (both allocated and unallocated) and the other risks and pressures identified, there is a high risk of an overspend this year. Agreeing the savings plan is critical to mitigating this risk.

Implications if recommendations rejected

Failure to agree the savings plan could potentially result in the Council spending beyond its means in 2006-07 and exhausting its remaining reserves. This would result in the statutory chief finance officer taking action under the relevant legislation and would leave the council in an untenable position with key services placed at risk.

Section 2: Report

Brief History

1. The Council is in a very difficult financial position. A report to cabinet on 29 June set out the situation in some detail.
2. In total the Council needs to achieve savings of £19.1m in the current year. Of this sum, £9.7m has already been allocated to specific service areas or distributed to budget holders. This paper sets out the detailed plan for delivering the remaining £9.4m.

Principles

3. Given the scale of the savings required this year and in future years, Members will need to consider which services and subsidies the Council

should provide in future and at what level. Value for money is a key consideration.

4. It is recognised that some short term measures are required to meet this year's budget. However, many of the proposals included in the savings plan are ongoing and contribute towards the medium term targets.
5. It is important to balance the statutory duties of the Council against the need to manage within resources.

Savings Plan

6. The attached savings plan (Appendix 1) includes a variety of measures. The plan delivers the required savings in 2006-07. The plan gives a brief description of the proposals, the start date, and the saving that will be achieved in 2006-07 and 2007-08.
7. Every effort has been made to reflect implementation costs in the figures, however there is still some detailed work to do in this area.
8. The individual savings projects have been evaluated for their impact on the Council's ongoing performance and priorities. Specifically the projects have been evaluated for their impact on the following criteria:
 - Ability to deliver against Corporate Priorities
 - Ability to deliver Residents' priorities that the Council understands through the Mori process and from the Open Budget
 - Commitments to the Harrow Strategic Partnership and LAA
 - Key performance indicators and key lines of enquiry which are impacting the Council's CPA position
 - Risk to other major projects across the Council, e.g. delivery of BTP
 - Consultation requirements
 - Impact on morale and the Council's workforce
 - Probability of statutory intervention by the Government
9. The Council has recently completed a major value for money study to assess the Council's spend and relative performance against our comparator Councils in London. This analysis has informed where our services are relatively high and low spenders and whether we are achieving the level of performance that is appropriate for our level of spend. The analysis is based on 2005-06 spend data and indicates areas where savings may be possible. However the analysis needs to be updated to reflect current spending levels and performance. The data will be reviewed against the savings achieved during 2005-06, the savings built into the original 2006-07 budget, and the savings contained in this plan as these all affect spending levels. The cumulative impact of these savings is £20m, however there has been growth in some service areas over the same period.

10. The plan shows a number of proposals to cut costs across different divisions of the Council (“cross-cutting”). The cross-cutting items will affect all Directorates – hence the total reduction in their budgets will include their share of these items.

11. Examples of the items included in the plan are set out below:

- Reductions in subsidies for services provided by the borough
- Savings generated by the Business Transformation Partnership
- Reductions in staff costs (eg, better controls in relation to overtime working, vacancy management, review of senior structure, review of PA and Administrative staff structure)
- “Harrow Saves” – a scheme to promote savings on smaller budgets such as catering and conferences

Business Transformation Partnership (BTP)

12. The contract with Capita includes a detailed cost model which sets out the phasing of capital and revenue payments and savings over a ten year period. The 2006-07 budget reflects this contractual model and therefore includes a savings target of £3.4m this year.

13. The contract has now been operating for 9 months and Harrow and Capita have jointly reviewed the cost model in light of this experience. Whilst both parties are confident that the full savings can be achieved over the life of the contract, the timing of the savings being delivered has been reviewed. This has resulted in the target for the current year being reduced by £2.1m to £1.3m. At the same time the allocation of payments between capital and revenue and the phasing of those payments has been reviewed to ensure that the net cost/benefit of the contract over the 10 year period is unchanged.

14. The revised target of £1.3m will be achieved through the implementation of new systems – Enterprise Resource Planning (ERP), which is an integrated finance, HR and procurement solution, and Management Information (MI) – the Access Harrow project, and strategic sourcing (i.e., more effective procurement). A detailed analysis of the savings from these areas has been agreed between Harrow and Capita and this means the Council is confident that the new target will be achieved.

Subsidies and Fees and Charges

15. The plan includes a number of proposals to reduce subsidies for those able to pay. These are set out in Appendix 2. Proposed changes to fees and charges are set out in Appendix 3.

Consultation

16. The plan will be widely communicated and there will be consultation with service users, residents, staff, unions, and other stakeholders.

17. In particular, statutory 12 week consultation with service users will be carried out on the following proposals:

- Home Care Subsidies
- Changes to the meals on wheels service
- Merger of Amner and Millmans Day Centres

Capitalisation

18. The plan involves capitalisation of £543k this year. This figure is reflected in the revised capital programme.

Ongoing monitoring during 2006-07

19. It is vital that progress against the savings in particular and achievement of the budget in general is monitored closely this year.

20. In addition to the regular monthly and quarterly reporting cycle, challenge sessions will be introduced – each Directorate will have to attend a meeting with the Deputy Leader, Chief Executive and Director of Financial and Business Strategy to discuss its forecast position against budget in detail.

Summary

21. The review of savings, economies and subsidy reductions summarised in Appendix 1 falls short of the goal of £9.4m by approximately £580,000. This shortfall is reflected in the fact that reserves will not be built up to the desired level by March 2007, and will, in fact, remain marginally below the minimum level approved by Council in February.

22. The overall position is summarised in the table below:

	2006-07 £m
Savings allocated in existing budgets	9.7
Unallocated savings and anticipated pressure on cost and resources	9.4
Savings presently identified for 2006/7	8.8
Shortfall in build-up of reserves	0.6

23. The ongoing savings reviews referred to in the Cabinet Report of June 29 will continue to look for the substantial savings required in 2007-08 and 2008-09 to balance the budgets contained in the existing MTBS. It must be borne in mind that the MTBS contains the assumption of Council Tax increases in each year of 5%. Further savings of £4.5m in each year would be required if Council Tax were to be held at existing levels.

24. The position for 2007-08 and 2008-09 is summarised below:

	2007-08 £m	2008-09 £m
Unallocated savings and anticipated pressure on cost and resources	9.3	4.2
Additional savings required if Council Tax is held at present levels and not increased by 5%	4.5	4.5
Total additional savings required in each year, over and above those for 2006/7, if Council Tax is held at existing levels	13.8	8.7

Financial Implications

25. Financial matters are integral to the report.

Legal Implications

26. Section 32 of the Local Government Finance Act requires the Local Authority to calculate its budget requirement (i.e. the difference between the expenditure and income) for each financial year. Section 28 of the Local Government Act 2003, imposes an obligation on the Authority to monitor and review its budget throughout the financial year using the same figures for reserves (unless they have been used to meet the financial shortfall of a previous financial year). The authority must take appropriate action to deal with any deterioration in the financial position revealed by the review. This action would for instance involve agreeing savings elsewhere in the budget to mitigate the situation.

27. Under S114 (3) of the Local Government Finance Act 1988 the chief finance officer of a relevant authority shall make a report if it appears to her that the expenditure of the authority incurred (including expenditure it proposes to incur) in a financial year is likely to exceed the resources (including sums borrowed) available to it to meet that expenditure. This report must be prepared in consultation with the Chief Executive and the monitoring officer. A report under this legislation would be the last resort and all possible steps should be taken to avoid this situation.

Equalities Impact

28. The impact of individual savings proposals on access to services should be considered as part of the decision.

Section 17 Crime and Disorder Act 1998 Considerations

29. The impact of individual savings proposals on the Council's ability to meet the requirements of Section 17 should be considered as part of the decision.

Section 3: Supporting Information/Background Documents

Appendix 1 – Savings Plan

Appendix 2 – Reduced Subsidies

Background Documents: None.

Reduced Subsidies

Charge	Current Rate	Current Subsidy	Proposed rate	Proposed Subsidy	Client Numbers %
Staff Parking	Free	£5 per day	£2 per day	£3 per day	N/A
Home Care – clients assessed to make no contribution	Free	£18.10 per hour	Free	£18.10 per hour	40%
Home Care – clients assessed to make a contribution	Clients pay part of costs only	Between £8.60 and £18.10 per hour	Clients will pay part of costs only	Between £2.10 and £18.10 per hour	34%
Home Care – clients assessed to pay full charge	£9.50	£8.60 per hour	£16.00	£2.10	26%

Notes:

Parking Charges

The current subsidy shown above is based on average daily rates for Harrow's public car parks.

Home Care Subsidies

One important subsidy relates to Home Care. Harrow Council has the second most expensive home care costs in West London and has been subsidising this heavily in order to provide the lowest charges, more than £3 lower than any other authority in that area. It is therefore proposed that the subsidies be reduced for those able to pay them, to bring them into line with other boroughs.

In order to ascertain whether people will continue to qualify for the subsidy, a financial assessment will be carried out for all clients to determine their ability to pay.

Based on the current figures, as of March 2006, this would mean the following:

- The 40% of clients who are currently receiving the service free of charge will continue to do so.
- The 34% of clients who pay a reduced amount are likely to continue to pay a reduced amount, albeit with a lower subsidy reflecting their ability to pay.
- The 26% of clients who are currently able to pay the full rate will now have a significantly lower subsidy from the Council.

It is extremely important to note that due to this financial assessment process approximately 40% of clients will pay nothing.

Cost of Home Care

The current charging arrangements for Harrow's home care service were introduced in April 2002, when a maximum charge of £81 was set with an hourly rate of £9.00 established. These rates were increased from April 2006 this year to a revised £85 maximum charge and £9.50 hourly rate.

Service users are visited in their own homes by a member of Harrow Joint Team and the service user's financial information is collected and verified. At the same time the service user will receive a full benefit check and forms relating to disability or other benefits are also completed to maximise their income.

In the group of North/North West London Councils, Harrow's current subsidies are the highest by a significant margin. Harrow's cost at 2004-05 prices is £17.10 per hour. At 2006-07 prices this would be approximately £18.10. As charges have only increased by £0.50 in this period, the current subsidy is estimated to be **£8.60** per hour.

The average cost for the boroughs (including Harrow) is £15.50. If this is inflated by 2.95% (in line with pay inflation) for 2006-07 this equates to £15.95 per hour.

If Harrow reduced its subsidy in line with the average for the other 8 boroughs (excluding Harrow) and allowing for inflation, the new charge would be approximately £16.00 per hour.

It is therefore proposed that the Harrow charge is increased to £16 per hour with effect from 1 January 2006. This still represents a subsidy of £2.10 an hour.

Value for Money

Harrow's average unit costs have been adversely affected by the former TUPE transfer of its directly provided service to an independent agency. Our contracts and commissioning team are engaged in negotiations with the agency to bring these down and work across all the local Home Care agencies to try and reduce the unit cost wherever possible.

The Council's Assessment and Care Management Teams work in close partnership with contracts/commissioning and Home Care agencies to try and ensure that care commissioned is the minimum possible for the tasks/outcomes to be achieved in order to get best value for money. This is an ongoing process.

Current capital threshold

In determining the extent to which an individual's capital assets count as income for charging purposes Harrow uses the C.R.A.G guide for Residential Accommodation in line with the majority of Local authorities. This is currently £21,000 and the figure is reviewed annually by the Department of Health. Property is excluded in determining the value of capital assets.

ANALYSIS OF PROPOSED CHANGES

MOVE TO 100% OF DISPOSABLE INCOME FOR ASSESSMENT PURPOSES

Service users with less than the current CRAG capital threshold of £21,000 (excluding their residential property) are assessed individually to see how much, if anything, they should pay.

Current subsidies are calculated on the basis of 75% of disposable income, after taking into account income and expenditure. (Allowances for Disability expenditure are made when a client is in receipt of a disability benefit Attendance Allowance / Disability Living Allowance.) The net figure is called the disposable income for the service user - this is the amount of income that is taken into account when calculating the service user's ability to pay.

In Harrow we currently take into account 75% of a service user's disposable income. However, 6 other boroughs in North West London use 100% and one uses 90-95%. Therefore Harrow is out of step with its neighbours.

It is proposed that subsidies should be calculated on the basis of 100% of disposable income, in line with almost every other relevant authority.

DECREASE THE HOURLY SUBSIDY

The council can no longer afford to subsidise the service to the extent it has previously, given increased demand for support with no matched central increase in funding levels.

It is proposed that there is a change to the hourly subsidised rate moving to a new hourly charge of **£16.00** (as referred to above). This implies an amended subsidy of £2.10.

As is the practice currently, every service user would be assessed to determine their level of needs and subsequently their financial contribution to the costs of their care (and offered a benefits check).

Each case would need to be considered following this assessment to establish whether the service user would prefer to make private arrangements without further recourse to the council thereby incurring no charges. Or alternatively knowing the level of their contribution they could consider the option of a direct payment (net of charges) which would enable them to arrange their own care or the council could arrange for care to be put in place using its block contracts.

REMOVE 10 HOUR CAP

There is currently an £85 per week maximum charge for the service regardless of the amount of care that is provided and at this level the service continues to be subsidised significantly.

A number of Local Authorities charge users who can afford to pay the full actual costs of the service they receive or they have determined an agreed unit cost for the service which is set at a more realistic higher rate than Harrow currently operates.

This is another area where Harrow is considerably out of step with other councils. It is proposed that the cap on the maximum level of charge for people who have difficulties that require more than 10 hours of support each week is removed as happens currently in Barnet, Brent, Ealing and Enfield.

For people with savings in excess of £21,000 (excluding the property value of the home they live in) this would mean these people would receive a reduced subsidy based on the difference between the cost and hourly charge of £2.10 per hour.

If, following a period of consultation and comments being considered, the proposals were to be adopted, and taking a prudent approach and allowing 15% for non-recovery of income, the combined impact of the steps outlined above is additional income in a full year of £1.1m and the current year of £275k.

Appendix 3

Changes to Fees and Charges

The main items are summarised below – more details will be published separately.

	Current 2005-2006 £	Proposed 2006-2007 £	Change %
Pre Application Advice			
(i) Formal Advice (followed up in writing) on major scale/complexity		1,000.00	
(ii) Formal Advice (followed up in writing) on medium scale/complexity		500.00	
(iii) Follow up charges based on hourly rates for officer attendance		Hourly rate of officer	
(iv) Planning Advice Team written advice per item		100.00	
(v) Repeat requests for advice		75.00	
Administration and Monitoring of S106 Agreements
