

Report for: Traffic & Road Safety

**Advisory Panel** 

Date of Meeting: 11 July 2023

Subject: INFORMATION REPORT

Information - Road Fatalities Review

**Key Decision:** No

Responsible Officer: Cathy Knubley – Director of Environmental

Services

Portfolio Holder: Councillor Anjana Patel – Portfolio Holder

for Environment and Community Safety

**Exempt:** No

**Decision subject to** 

Call-in:

No, the report is for information

Wards affected: North Harrow, Edgware, Pinner, Centenary

**Enclosures:** None

# **Section 1 – Summary and Recommendation**

This information report is presented to members to provide an update.

#### Recommendation:

The Panel to requested to note the contents of the report.

Reason: (for recommendation)

The report is for information only.

# **Section 2 – Report**

## Introductory paragraph

This information report provides members with an update on the traffic related incidents resulting in fatalities on borough roads in the last 18 months.

The report also outlines the actions taken by officers following these incidents.

It should be noted that Harrow Council as the Highway Authority has a statutory duty to investigate casualties and where appropriate, introduce change to mitigate the risk of further occurrences.

#### Pinner Road/Station Road Junction (North Harrow)

The incident was an HGV on cyclist collision which occurred on Saturday the 21 of August 2021 at 1518hrs at the Pinner Road/Station Road junction.

The male cyclist passed away at the scene.

Prior to the incident, officers had been looking at improving the junction for pedestrians and buses. However, the scope has changed to include cycle facilities, which is currently being investigated and designed.

**Update March 2023** - The Police report confirms that no highway factors were identified in relation to this incident however, it was suggested whether cyclists can share footway space on all approaches to the junction, in particular the south-eastern arm.

Schemes on the programme for 23/24 include reviewing this junction and designs will prioritise measures to aid cyclists and pedestrians.

**Update July 2023 –** Improvements for walking and cycling at this junction are being looked at as part of a review of three major junctions in North Harrow along with a cycling scheme and speed reduction scheme. Feasibility, design and consultation and partial implementation will be completed this financial year.

#### Mollison Way (Edgware)

The incident was a car-on-car collision which occurred on Sunday, 20 March 2022 at 0830hrs.

An elderly female in a vehicle coming out of a driveway and was hit by a speeding vehicle. It was initially reported that she suffered severe injuries but passed away later. The driver of the other vehicle was arrested.

Officers have undertaken speed surveys and met with the Leader on site to determine the factors that led to the incident.

The speed data shows that the 85<sup>th</sup> percentile speed is 31mph while no obvious factors were identified from the site visit.

The Police report confirms that speed was a factor in the collision. It also notes that visibility is obscured by on-street parking. The recommendation is to examine the speed survey information to confirm the degree of speeding vehicles. Consider whether some additional horizontal deflections might be reintroduced, not reliant on parked vehicles being present. If more generalised area-wide 20mph restrictions were applied to Mollison Way then some vertical deflection traffic calming might be appropriate.

**Update March 2023 -** A review of the borough is currently underway which will prioritise locations for 20mph zones and limits.

**Update July 2023** – The initial assessment of locations in the borough resulted in Mollison Way scoring the highest of all roads in the prioritisation process. It was agreed to proceed with design work immediately. Design, consultation and implementation will be carried out this financial year.

#### **Uxbridge Road/Waxwell Lane Junction (Pinner)**

The incident occurred on Sunday the 31<sup>st</sup> of July 2022 at 1823hrs involving a car and an elderly male pedestrian.

The man was attended to on site by the emergency services but sadly passed away.

Officers have met the Leader on site to discuss the possible factors that led to the incident and if possible, recommend solutions.

Based on the outcome of the site visit, officers recommended that the junction was included in the TfL LIP programme for improvement commencing with the design of potential options this financial year and consultation and possible implementation in 23/24.

**Update March 2023 -** The Police report recommends repositioning the central islands, particularly the one to the east of the junction and improvements to pedestrian crossing facilities.

Options to improve pedestrian crossing at this location are being investigated and will be reviewed by the Leader of the Council.

**Update July 2023 –** Investigation work continues. Design and consultation will be completed this financial year, implementation will be subject to the availability of sufficient TfL funding this financial year.

#### **Culver Grove (near junction with St Andrew's Close) (Centenary)**

The incident occurred on Sunday, 7 August 2022 at 00:15hrs involving a car and a 62-year-old man who passed away at the location.

Officers met with the Police on site to determine whether the incident was caused by speeding or the layout of the road. Nonetheless, surveys where undertaken to determine the extent of the speeding at this location, which showed that the 85percentile speed was 30mph.

A site meeting with the Leader did not identify obvious issues or factors that could have led to the incident.

**Update March 2023 -** The Police report did not identify any highway factors and recommended clearing back any foliage from street lighting. This took place during the site visit.

#### **George V Avenue**

The incident occurred at 10:55am on Friday 14 April 2023 involving a 65-year-old man and a car. The pedestrian was initially seriously injured but has sadly since passed away.

Officers met with the Police on 14 June 2023. The full police investigation has not been concluded at the time of writing this report.

It is understood that the pedestrian was crossing George V Avenue south-westbound, following the public bridleway that runs between Headstone Lane and Wakehams Hill.

At this stage, it has not been confirmed that speed was a factor however, automatic traffic count surveys were undertaken from 7<sup>th</sup> to 13<sup>th</sup> May measuring speeds and volumes of traffic at the location. These show that the 85<sup>th</sup> percentile speed was 43.3mph northbound and 41.6mph southbound, average speeds were 37.3mph and 36mph respectively, indicating no speeding issues.

The Police have recommended the following;

- that the wild grass and flowers are trimmed/removed by LB Harrow as soon as practicable to improve the vision for pedestrians and vehicles at the location.
- that road markings at the location are refreshed by LB Harrow as soon as practicable.
- that a pedestrian count be carried out by LB Harrow at this location to determine the volume of pedestrians using the bridleway and crossing the road at this location.
- If the result of the pedestrian count is significant then it is recommended that LB Harrow considers the installation of a pedestrian crossing point at this location.
- A speed survey has already been carried out at the location and LB Harrow are awaiting the results. If vehicle speeds are found to be an issue then appropriate solutions can be discussed.

All of the above recommendations have been requested/actioned as appropriate.

## **Options considered**

None

## Staffing/workforce

This review has been undertaken using existing staff resources within the Traffic, Highways & Asset Management Team.

#### Ward Councillors' comments

Ward Councillor comments have not been sought for this report because it is for information only.

#### **Performance Issues**

The development of any schemes arising from this review would support the wider aims, objectives and targets in the current Transport Local Implementation Plan (LIP) and help to deliver Harrow's corporate priorities and in particular the Vision Zero Strategy.

## **Environmental Implications**

The development of any schemes would support the wider aims and objectives of the current Transport Local Implementation Plan (LIP). The LIP underwent a Strategic Environmental Assessment (SEA). This indicated that there are environmental benefits from delivering the programme of investment.

Key population and human health benefits identified were from reducing casualties, encouraging active travel and improving air quality. The benefits associated with increased active travel and healthy lifestyles help reduce diabetes and obesity levels. No negative environmental issues were identified as part of the SEA.

## **Data Protection Implications**

There are no data protection implications.

# **Risk Management Implications**

Risks included on corporate or directorate risk register? **No** 

Separate risk register in place? No

The relevant risks contained in the register are attached/summarised below **n/a** 

## **Legal Implications**

There are no legal implications to be noted as the report is for information purposes only.

Under Part 3A of the Council's Constitution, the terms of reference of TARSAP is to make recommendations on traffic management, the management and control of parking both on and off-street and the operational aspects of public transport within the Borough but includes other business, such as: petitions, deputations, scheme approval (from existing budgets), including consultation results and authority to make traffic orders and objections to traffic orders.

## **Financial Implications**

Any schemes and works programmes mentioned in this report are being taken forward using identified resources within the 2023/24 capital programme and confirmed funding allocations from TfL, DfT, NCIL funding and developer contributions.

## **Equalities implications / Public Sector Equality Duty**

LIP3 underwent an Equalities Impact Assessment, and the Council has had due regard to the need to eliminate discrimination, advance equality of opportunity and foster good relations between persons who share a relevant protected characteristic and those who do not share it as required under section 149 of the Equality Act 2010.

It is considered that the proposed scheme will be of benefit to all and particularly the groups in the table below:

Protected characteristic	Benefit
Sex	Mothers with young children and elderly people generally benefit most from schemes that prioritise walking, cycling and public transport. Improved road layouts and public realm provide improved safety, security and convenience and improved access to the town centre and facilities.
Disability	People with physical and visual impairment generally benefit most from schemes that prioritise walking and public transport because improved road layouts and public realm provide ease of access with fewer obstructions, improved safety, security and convenience to access the town centre and facilities.
Age	Young children and elderly people generally benefit most from schemes that prioritise walking, cycling and public transport because improved road layouts and public realm provide improved safety, security, convenience, improved access to the town centre and facilities. A reduction in the influx of traffic into an area will reduce particulate emissions and air

pollution, vulnerable	which	children	are	particularly

#### **Council Priorities**

The LIP3 and associated programme of investment detailed in the report support the Harrow ambition plan and will contribute to achieving the administration's priorities:

- 1. A council that puts residents first
- 2. A borough that is clean and safe
- 3. A place where those in need are supported

# **Mandatory Checks**

Ward Councillors notified: NO, as the report is for information

only

EqIA carried out: YES, as a part of LIP3

EqIA cleared by: Equality Task Group (DETG) Chair

# **Statutory Officer: Cathy Knubley**

Signed the Director of Environmental Services

Date: 28 June 2023

# **Section 4 - Contact Details and Background Papers**
