#### **Notes:**

1. The table is based on an assessment of the DC Committee agendas for the past 12 months, identifying how many applications on those agendas would not be delegated under the new scheme and therefore still remain for the Committee to determine. These are shown in columns (a) – (i).
2. 'Call-ins' shows the actual number of delegated applications dealt with by the Committee as a result of a request of a nominated member.
3. 'New Scheme Total' shows the total number of applications that would have been on the agenda with the proposed new delegation scheme in place.
4. '% not delegated – new scheme' shows the % of applications that would not have been dealt with by delegated powers for each calendar month – 'new scheme total' as a % of monthly total applications determined.
