She further advised that applications were determined on an individual basis and based on their individual merit.

### **TEMPLE HOUSE, 221-225 STATION ROAD, HARROW, HA1 2TH**

In response to queries raised by Members officers confirmed:

- a request had been received from the Greater London Authority (GLA) to view the application at Stage 2;
- representations had been received from the developer suggesting a reduction in the Section 106 contribution to £30,000, rather than the £50,000 proposed. The decision on this remained in the Committee's remit;
- there was considered to be a glut of low rental properties for business purposes and the proposed reduction in accommodation was not envisaged to create an issue in terms of supply and demand

## **DECISION:**

- (1) Authorise in principle permission for the development described in the application and submitted plan, subject to the completion of a legal agreement and the conditions and informatives reported.
- (2) The level of contribution within the Section 106 Agreement be retained at £50,000.

In introducing the report the Divisional Director Planning referred the Committee to the addendum and policy changes identified therein. He further noted that the proposals did not, at this stage allow the identification of the numbers of housing units to be created as this would be related to the determination on available floorspace. However, the development proposed a ration of affordable housing at 25% of the floorspace of the development.

A Member raised several questions which were responded to as follows:

- The parameters and areas for development were unchanged in this application, save for a reduction in the total footprint of the development.
- The GLA had indicated its satisfaction with the proposed development.
- The residential development aspect was anticipated to be of a multi-floor nature.

**DECISION:** GRANTED permission for the development described in the application and submitted plan, as amended on the addendum, subject to the completion of a legal agreement and the conditions and informatives reported.

The Committee noted that there were no specific plans for a play area within the development and that parking would remain at existing provision with on street also available.

The Committee received representations from an objector (Mr Schusman), the applicant (Mr Shah) and a Member (Councillor Bath) which were noted.

Members noted the site visit undertaken had proved valuable as part of the consideration of the application. Concern was expressed that the proposals would result in detriment to the street scene as it resulted in infill of a building gap and this impacted upon the view from metropolitan open land to the rear of the site which needed to be considered in the context of Policy EP43 (MOL/Green Belt Fringes policy).

**DECISION:** REFUSE permission for the development described in the application and submitted plans, as amended in the addendum, for the following reason:

“The proposed extension would be out of character and would disturb the rhythm of building and space within the established pattern of development in the street, would be detrimental to the visual amenity and appearance of the street scene and would represent an obvious interruption in the pattern of development when viewed from the MOL to the rear of the property, contrary to HUDP policies D4 and EP43.”

In considering the application Members expressed their regret that consideration had not been given to ensuring the forecourt area remained a clear space.

**DECISION:** REFUSED permission for the development described in the application and submitted plans for the following reason:

“The proposal, by reason of its forward projection into the forecourt, would be an intrusive feature forward of the established building line, which would be detrimental to the visual amenity and character of the area and would appear to be incongruous and out of keeping when viewed from the north along Edgware High Street, contrary to HUDP policies D4 and D7.”

The Committee agreed to consider the two applications in respect of the above development at the same time and that its comments be applied to both applications.

Replying to the various issues raised by the Committee officers confirmed that:

- The developer would need to provide examples of the materials to be used to replace the hayloft and stable doors.
- Photographic history existed showing the style of barn doors originally in situ and the developer would be expected to replace like for like, in terms of both style and material

The Committee emphasised the importance of the building materials utilised to replace key features, including the hayloft and stable doors, should be as close to the original intention of the listed building as possible and agreed that Condition 9 be strengthened to reflect the need to ensure this action.

The Chairman further requested a report be brought to the next meeting assessing possible breaches of planning/listed building control and the Council's remedies to rectify any such breaches.

- The number of persons identified as part of the development proposal was in accordance with the design guide principles.
