

Energy Service Companies (ESCOs) being used on the RE:FIT programme

Central to the RE:FIT programme is the existence of a framework panel of approved energy services companies with pre-agreed contracts and defined deliverables (this has been delivered through an OJEU process). This framework will now help public sector organisations to avoid lengthy and complex procurement processes.

The London Development Agency (LDA) has established this framework panel and supporting approach for energy performance contracting. This will allow for faster procurement process using pre-approved suppliers and contract conditions.

The following companies have been selected as framework suppliers:

- Balfour Beatty
- COFELY (GDF SUEZ)
- EDF Energy
- E.ON Sustainable Energy Business
- Honeywell Control Systems Ltd
- HurleyPalmerFlatt Ltd
- Interserve
- Johnson Controls
- MITIE (Dalkia FM)
- Parkeray
- Schneider Electric's Buildings Business (TAC)
- Wilmott Dixon Ltd
